***Response to Arguments***

Applicant's arguments filed March 28, 2007 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-6, independent claim 1 recites "ascertaining .. attenuation of signal strength of transmission from the alternative access point." However, in the specification on page 82, lines 3-6, an attenuation level is a received power level. Further, on page 49 of the specification, the received power and the TP backoff are used to calculate a distance to the AP. Therefore, Applicant's arguments that the "attenuation of signal strength of transmission from the alternative access point" does not represent a received power level make the claims unclear. Examiner suggests "attenuation of signal strength of transmission at the alternative access point" to clarify that the attenuation occurs at the alternate access point.

*Allowable Subject Matter*

Claims 1-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
